

## DEAR FRIENDS, DEAR NEIGHBOURS,

**I urgently need your help!** But not only me, above all the bees and other pollinating insects and rural agriculture need your help!

**Our food production is in danger! Bees, butterflies and other insects are dying out due to the use of pesticides.** Yet they provide a third of our food through pollination. In order to prevent their extinction, many committed bee rescuers like me are collecting signatures for **the European Citizens' Initiative "Save Bees and Farmers"** all over Europe. We need a total of one million signatures, then the EU Commission will have to take into consideration our demands.

In pre-Covid times, we could have met in the street, in the market square or at local community events and I would have collected signatures for the initiative there. I choose this unusual path because at the moment many of these opportunities are on hold. **I want to continue to fight for the ban of toxic pesticides, the preservation of biodiversity and sustainable, ecological agriculture. That is why I have sent you a paper form for signing.**

**Please, sign the European Citizens' Initiative "Save Bees and Farmers" and distribute this list and other lists** to family members, flatmates and friends so that they can also sign and motivate other people to do the same. **Here you can download and print more lists and this letter:**  
[https://www.savebeesandfarmers.eu/w/files/lettersdearneighbour/letter\\_iv.pdf](https://www.savebeesandfarmers.eu/w/files/lettersdearneighbour/letter_iv.pdf)

### I count on you and your help! Every signature matters!

Fill in all fields correctly and completely (more information on the next page). Please drop the completed signature lists in my mailbox or send them directly to the ECI "Save Bees and Farmers" Office (you will find the address at the bottom of the paper form).

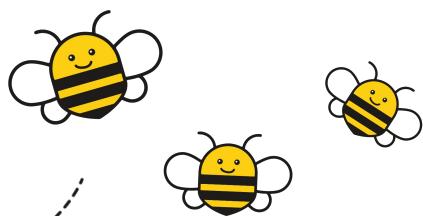

**Thank you for your support! \***

# European Citizens' Initiative "Save Bees and Farmers"

## Collection information:

A European Citizens' Initiative (ECI) is an official tool of political participation covered by EU law. If we succeed in collecting one million signatures for our ECI, the EU Commission is legally obliged to respond to our demands.

### What do I have to keep in mind when collecting signatures?

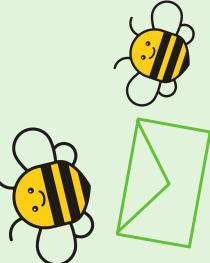

- **All fields must be filled in completely and legibly and you must sign.**
- Only then will your vote be counted.** In the nationality field write "Latvian" or "Latvia" DO NOT use abbreviations like "LV" for "Latvia" or „Latvian".

#### Please fill in all fields completely (**WITHOUT abbreviations**) and legibly and sign - only then is your vote valid!

Signatures are collected on official ECI lists. Which data is collected is determined by the respective EU member States. In order for your signature to be valid and counted, You must fill in all fields completely and sign.

- On the Latvian lists, which are marked with "LV" in the top right-hand corner, all adult citizens of an EU member state who are registered in Latvia can sign. In addition, citizens who are registered abroad and have informed the Latvian authorities of their residence can sign.

- **The signatures are valid even if only one, two or three persons have signed on one sheet.**

#### How can I stay informed?

You can also sign the initiative online at [www.savebeesandfarmers.eu](http://www.savebeesandfarmers.eu) and subscribe to our newsletter to stay informed about the current status of the campaign.

**Information and answers to content-related and technical questions about the ECI can be found online at:**

**Eiropas pilsoņu iniciatīvi:  
GLĀBIET BITES UN LAUKSAI  
Virzībā uz bītēm draudzīgā**

PRIEKŠLIKUMA BŪTĪBA JEB PRIEKŠMETS:

Lai aizsargātu bites un cilvēku veselību, mēs aicinām Komisiju ierosināt tiesību aktus nolūkā līdz 2035. gadam pakāpeniski pārtraukt sintētisko pesticīdu lietošanu, atjaunot bioloģisko daudzveidību un atbalstīt laukaimniekušus pārejas posmā.

GALVĒNIE MĒRĶI:

Līdz 2030. gadam pakāpeniski pārtraukt sintētisko pesticīdu lietošanu ES lauksaimniecībā par 80 %, sākot ar visbūtākajām vielām, un līdz 2035. gadam pilnībā atbrīvoties no sintētiskajiem pesticīdiem; atjaunot dabiskās ekosistēmas lauksaimniecības platībās, lai lauksaimniecība kļūtu par bioloģiskās daudzveidības atjaunošanās vektoru; veikt lauksaimniecības reformu, par prioritāti izvirzot mazā apjomā, daudzveidīgu un ilgtspējīgu lauksaimniecību, atbalstot strauju agroekoloģiskās un bioloģiskās lauksaimniecības prakses pieaugumu un nodrošinot neatkarīgu, uz lauksaimniekiem balstītu apmācību un pētniecību pestīcīdu un ģMO nesaturošas lauksaimniecības jomā.
